ECI - Metro

AUTHORIZED CAT DEALER · WESTERN CHINA · SINCE 1995

Cat equipment & support overview

Machine selection, genuine parts and lifecycle support for project buyers.

Prepared for international contractors, mining operators, EPC teams and dealers.
Product availability and export eligibility require destination confirmation.

PLAN WITH ECI-METRO

Start with the application, not the ca

This guide helps structure an equipment inquiry around material, access, output, work
parts, service and destination requirements.

A better equipment brief

The details that shorten the path from inquiry to a usable proposal.

01 / APPLICATION

- Project type and work stage
- Material type, density and fragmentation
- Site access, bench or road geometry
- Target output and shift pattern

02 / MACHINE

- Required machine class or model
- Bucket, breaker or other work tools
- Transport and lifting constraints
- Local emissions and specification rules

03 / SUPPORT

- Genuine parts package and wear items
- Maintenance intervals and service access
- Component repair or rebuild options
- Operator familiarisation requirements

04 / COMMERCIAL

- Destination country and port or site
- Quantity and target delivery window
- Purchase stage and decision timing
- Dealer territory and export eligibility

PROJECT INQUIRY

LIFECYCLE SUPPORT

The equipment decision does not end at delivery.

Genuine parts, maintenance planning, component repair, repower and full-machine refurbishment can be part of the scope.
